# FATIMA SEBA

## *BUSINESS SYSTEMS & PROCESS AUTOMATION SPECIALIST*

Cilento, Salerno, Italy | +39 331 447 247 | fatimaseba.career@gmail.com

Portfolio: https://sebafatima.github.io/portfolio-website/

### PROFESSIONAL PROFILE

Business systems and process automation specialist with more than seven years of experience improving operational workflows, developing custom Excel-based systems and standardising cross-functional reporting. Translate requirements from business owners, accountants and operational teams into practical solutions for sales, inventory, receivables, payables, financial reporting and project controls. Experienced across the delivery cycle: process investigation, information design, automation, documentation, user training and ongoing support. Project work spans agriculture, distribution and construction, including systems adopted for day-to-day operations.

### CORE CAPABILITIES

Business requirements gathering • Process improvement • Excel system design • Spreadsheet automation • Data standardisation and validation • Operational and financial reporting • Cross-functional collaboration • User training and support

### PROFESSIONAL EXPERIENCE

**Independent Business Systems & Excel Automation Consultant**

*Remote, Italy | July 2023 – July 2026*

- Designed and delivered custom Excel-based systems for business clients, translating paper records and fragmented spreadsheets into integrated data-entry, control and reporting workflows.
- Developed an operational and financial control system for a cattle and dairy business, covering account structures, transaction records, general ledger, receivables, payables, financial statements and currency-related reporting; collaborated with the accountant on domain requirements. The system has been in operational use for more than six months.
- Built multi-company cash-flow and budgeting workbooks to monitor available balances, upcoming commitments, spending allocations and expected cash positions.
- Created financial and administrative workbooks to track transactions, bank balances, outstanding payments, debts and management information; provided paid ongoing maintenance, enhancements and user support.
- Developed a construction-project control workbook consolidating contract values, estimated and actual costs, invoicing, collections, approved change orders and profitability summaries.
- Designed inputs and instructions for nontechnical users, trained staff and refined solutions in response to real operational feedback.

**Technical Support (Business Systems & Reporting)**

*Inversiones Delatt C.A. | Venezuela | August 2018 – February 2023*

- Progressed from digitising handwritten warehouse records to designing and maintaining Excel-based inventory, purchasing and operational reporting tools supporting multiple departments.
- Reorganised stock and supplies data into structured registers covering quantities, costs, departmental consumption and low-stock alerts; extended the approach to animal-feed control and trained the employee responsible for ongoing use.
- Developed standardised sales-reporting workbooks for four regional areas, bringing together quantities, inventory movements, customer/territory data, collections, outstanding balances, returns and expenses for central management and accounting reporting.
- Prepared recurring sales and production reports covering four poultry houses, including production volumes, mortality, losses and sales performance, for management reporting and presentations.
- Automated repetitive accounting work with Excel formulas and macros, including cleaning and standardising bank statements from approximately five banks; supported account searches and recurring financial summaries.

- Improved an HR workbook maintaining records for more than 200 employees; supported payroll and invoice records, documented procedures, trained colleagues and troubleshot business spreadsheets as requirements changed.

## EARLIER EXPERIENCE

Bilingual Assistant Teacher | María Montessori Bilingual School | 2018

Administrative Coordinator | Sweet & Savory M.C. | 2017
